(RESUME)

UI / UX DESIGN STUDENT

NAVYA Gupta

ABOUT ME

UI/UX Design student focused on creating simple, thoughtful, and user-centered digital experiences. I enjoy turning ideas and user needs into clear interfaces through research, problem-solving, and visual design. Currently building my skills through hands-on projects and exploring how thoughtful design can make everyday experiences easier.

EDUCATION

- **Bachelor of Arts (BA) — Undergraduate**
  Currently Pursuing
- **Class XII (Humanities)**
  Maheshwari Public School, Jaipur · 93.6%

SKILLS

UX Research | Information Architecture | User Flows | Wireframing | Persona Development | Visual / UI Design Basics

DESIGN TOOLS

Figma	FigJam	AI Design Tools
CorelDraw	Photoshop	Illustrator
Rhino	Canva	Matrix

PROJECT

HOPE — Senior-Friendly Support App

Solo · Coursework

- Designed a combined support app for older adults, bringing task reminders, family connection, verified volunteers, community, and Smart SOS into one experience instead of several separate apps.
- Conducted primary research (user interviews) and AI-assisted secondary research; built 3 user personas, edited for distinctiveness.
- Built comparative analysis of existing apps, information architecture, user flows, and wireframes, in that order.
- Tested a 6-tab navigation structure, rejected it after seeing it visually cluttered, and simplified to a 5-tab structure to reduce clicks for elderly users.
- Designed a 3-tier autonomy model (Independent / Assisted / Family Managed) so users can choose their own level of support.
